

I love to use VRS than Relay service TDD because I understand to communicate with video that it make me very important. I am really happy that it is new VRS. I use VRS everyday than TDD. I am not smart to type language. I was to use TDD with Relay Service and I was misunderstanding with my language. I use VRS and call to hearing people and communicate between me to relay with video. It is real for me important. Why FCC try to eliminate VRS? It is no reason. I say truth to love VRS. I want you keep on VRS. I believe that VRS will grow fast soon. I talk deaf people about VRS. They want to get VRS. DO NOT destroy VRS. Please support strong
